Meet Udemy Business

Udemy Business offers a unique set of comprehensive learning solutions that enables talent development across all functions and levels of the organization. Their collection features thousands of high-quality, in-demand courses that are created and updated at the speed of market change, helping employers achieve their most critical business goals.

Phenom + Udemy Business Partnership Integration

Skills have not only become the building blocks for employee development and mobility — they're essential to future-proofing your organization in the face of talent shortages. Upskilling, reskilling, and redeploying talent is more important than ever. With Phenom and Udemy Business, companies can elevate their entire workforce through learning to foster career progression, and thrive in this new era of work.

Personalize Coursework Recommendations

Illuminate opportunities to help employees achieve their next career step

Automate Profile Updates

Automatically add new skills upon completion of coursework

Improve AI Matching Abilities

Discover new career opportunities based on completed courses

Empower your Employees

From job recommendations based on skills and interests to creating customized career paths, Phenom supports employees with greater visibility and opportunity. Additionally, employers can improve retention and engage employees with the tools they need to find internal opportunities, refer talent, and stay connected.

For organizations already using the Phenom talent experience platform, our AI-powered Talent Marketplace and Udemy's integration illuminate upskilling opportunities to help personalize the unique career path of every employee.
